Official Wheat Pool Statement re Initial Payments.

The Central Selling Agency has issued an official statement by E B Ramsay, secretary and manager, announcing that the initial payment for the 1928 crop will be 85c bu., basis No. 1 Northern at Fort William and Vancouver.

Mr Ramsay says the Wheat Pool board in taking this step is following the same consistent policy pursued from the formation of the Pool.

The initial payment of the

Pool in 1923 was 75c per bu. The initial payment for the four subsequent years was \$1 per bu.

The initial payment has always been based on market conditions at the opening of the crop year and bears no relation to the price per bu. ultimately received by Pool members.

The recent Pool interim payment which brought the payment already made to the members for last year's crop up to \$1.40 bu. basis No. 1 Northern Ft. William or Vancouver, should have made reference to absurd rumors in regard to large stocks of wheat held by the Pool unnecessary.

The endorsement of the Pool by the great majority of grain growers of western Canada who have signed up for another five year term is sufficient proof that the faith of our members in orderly marketing has not been shaken.

LOCAL NEWS.

Mr Leonard Watkins, of Wainwright, was a week-end visitor with Corp. Moses.

Mr and Mrs Comisarow visited with friends in the City over the week-end.

Mr Peters, of the Brooks Grain Co., has moved to the residence recently purchased from Mr Odenbach.

Mr and Mrs D W Pattie, Rocky Mountain House, are spending a vacation with friends here.

Young Philip Ursel, son of Jac Ursel Sr., is recovering, at the Misericordia hospital, from the effects of an operation for appendicitis.

The trek to the harvest fields of Saskatchewan is still on. Geo Ashmead left Saturday for Dodsland, on an offer of \$15 a day, to run a combined harvester.

The annual Fair for pupils in Stony Plain school fair district will be held on Tuesday next, Sept. 11. Great interest is being taken in this one, and the large number of entries received will make it an interesting one.

Electrician Trapp has gone to Greencourt.

If your eyes bother you, or you suffer from headaches, why not have your eyes attended to by an expert? M M Mecklenburg, eye specialist, 10159 101st St., Edmonton.

Sporting Notes.

One of the best ball games of the season, was the verdict of those who saw Waltham League beat the Hudson Bay team on local grounds, last week. Leaguers had a streak of luck right in the first innings and bagged half-a-score of runs. Following this, only one run was scored by either side up to the last innings, when the Bay boys became reckless and played wild. Battery for League—Ph Enders p, H Trent c.

At the ball game on the afternoon of the 2d Waltham League lost to a team from Edmonton Stockyards by the score of 11 runs to 14.

Threshers' News.

A meeting of threshermen has been called for Saturday evening next. It is understood the same rates for threshing grain which prevailed last year will again be in force this season, altho there may be a few independents who may not comply with these rates.

Owing, 'tis said, to the large number of young men going to the harvest fields in the south and east, threshermen will experience some difficulty in engaging competent men to make up their crews.

The attention of threshermen is called to the advt. of Dept. of Agriculture in another column, directing all those operating threshing machines and combined harvesters to register their machines and get a license.

See the New UTILITY TRUCK

Built to Win Favor on Western Farms

EQUIPPED with the special grain body illustrated, the New Chevrolet Utility Truck is the ideal haulage unit for the Western Canada farmer.

It handles full loads with the greatest ease . . . enables you to cut down the time and expense of hauling . . . and offers dependable performance, even in heavy mud and sand. Practically every part of its chassis is oversize.

Come in and see the new Chevrolet Utility Truck! You will find that it affords everything you could possibly want in a haulage unit of this capacity—unusual pulling power—remarkable performance—amazing handling ease—and outstanding economy of ownership and operation.

Let us give you figures on its low maintenance costs.

A Real Menace

Summer is on the wane. The nights will soon be nippy and chill, and if we have not been careful to stock up on our bank of health with a little surplus of energy during the long sunny days, we may be disgusted to find ourselves with a developing common cold.

So declares the Canadian Red Cross magazine in discussing what it characterizes as a real menace in this country, Coryza is the official name of the common cold, but the name is not very indicative of the nastiness of the disease at first blush. Coryza is a real menace. There is no other affliction that quite so universally causes discomfort or so great a loss of time for workman, business man, and school child.

A lowering of vitality means a slow-down in usefulness or production, and time lost in our busy age is a money loss somewhere, or somehow, to someone. Remembering, however, that a nation's health is a nation's wealth, we'll cease to think in dollars.

The real menace of a cold is its possible bad after-effect on the individual. As it is caused by varieties of bacteria very closely allied to those responsible for the pneumonias, for bronchitis, laryngitis, and possibly catarrh, it often leaves in its wake damages that are permanent.

When we speak of "catching" cold, we speak correctly, if by "catching" we mean getting it from the other fellow. About ninety per cent. of our colds come from him.

Very rarely one may develop his own cold, for these germs probably are ever-present in the nose and throat and will multiply and thrive should the vitality of the host be sufficiently lowered to furnish a good culture ground for their growth.

This may be effectively accomplished by avoiding fresh air and sunshine, by loss of sleep, by over-fatigue, or by living in over-heated rooms. Insufficient, improper, or excessive food or clothing assists greatly.

But for the vast majority of our colds, we may blame close contact with our neighbor who coughs, sneezes, and spits, and who uses his handkerchief to saturation and then greets us with a friendly handshake.

Ignorance of man-made laws excuses no one; ignorance or disregard of the laws of health eventually spares no one. The person with a bad cold should be regarded as having a dangerous communicable disease, and we should know enough, and our children should be taught, to avoid him. Even among people who realize this, knowledge generally outstrips practice, and on and on goes the cold.

The trouble is that the vast majority of people do not regard the common cold seriously enough. If they, or their dear ones, contract tuberculosis, or are stricken down with pneumonia, they are seriously alarmed, but they overlook the fact that the common cold may be but the forerunner of these and other dread diseases. "Oh, it is only a cold," they indifferently say with a shrug of the shoulders, ignorant or careless of the fact that the cold will quickly seize upon the weakest spot in the human body, whether it be the throat, the nose, the lungs, the heart, the kidneys, or elsewhere, and when at last realization comes that there is something seriously wrong it is frequently too late.

"It is the little things in life that are causing all the strife," is an old saying. It is also what we ignorantly regard as the little things that are responsible for most of the ills from which mankind suffers. Make no mistake about it, the common cold is no little thing although we may look upon it as such. Get after it the moment its first symptoms make their appearance. Better still, exercise all those precautions necessary to prevent taking a cold in the first instance.

Finally, if you can't or won't dodge the common cold, then at least don't make it necessary for your neighbor to dodge yours.

Rust Resistant Wheat

Within Three Years New Variety Should Be Available Which Will Grade As High As The Best

Within three years Western Canada should have a rust-resistant wheat which will grade as high as the varieties now being grown, according to L. H. Newman, Dominion cerealist, who is spending a few weeks in the West, inspecting the work of the Dominion Rust Research Laboratory at the Manitoba Agricultural College and the various Dominion experimental farms in the West. He will also visit farms where rust-resistant grains are being produced for experimental purposes.

Canada Farmers Have Advantage

"Wheat farmers of Montana alone paid nearly \$5,000,000 more in freight rates on their wheat crops in 1927 than they would have paid had they lived in Canada," stated Senator Wheeler of Montana, speaking in the United States Senate recently.

Demand For Farm Implements

Saskatoon Dealers Report Increased Volume Of Sales

Saskatoon implement firms record an increased volume of sales for this year, ranging from 25 to 100 per cent. over those at this time last year. An encouraging feature, too, is that cash deposits are larger this year. An active demand for combine-harvesters is also noted and a large portion of implements purchased such as plows, discs, etc., have been for tractor equipment.

An Important Industry

The pulp and paper industry is the most important manufacturing industry in Canada; heading the lists in 1926 for gross and net value of manufactured products as well as for distribution of wages and salaries. In total capital invested the industry is second only to electric light and power plants and in total number of employees it is second only to saw-mills.

Youthful Charms Enhanced By Cuticura

Soap and Ointment. Regular use of the Soap, assisted by the Ointment as needed, will keep the complexion fresh, clear and youthful and the hair lustrous and healthy. Cuticura Talcum is fragrant, cooling and refreshing, an ideal toilet powder.

New Phone Service

Inauguration Of All-Canadian Service Between Winnipeg and Montreal

Inaugurating the all-Canadian telephone service between Winnipeg, Toronto and Montreal, via Port Arthur and Fort William, officials of the Bell Telephone Co., the Canadian Pacific Railway and the Manitoba Government spoke to one another across 1,605 miles of copper wire recently. The new line between Winnipeg and Montreal has nine repeated amplifying stations. Its total weight is 350 tons.

A TIRED-OUT FEELING

Is a Sure Sign That The Blood Is Thin and Watery

"I am glad to have an opportunity of testifying to the benefits I derived from the use of Dr. Williams' Pink Pills," writes Mrs. Lawrence Kennedy, St. Joseph, N.B. She further says:—"Some years ago I was working as a stenographer, and became badly run-down. I always had a tired-out feeling, had no appetite and suffered terribly from backache. Almost every month I had to remain from the office for a day or two. I was advised to try Dr. Williams' Pink Pills, and I have reason to be glad that I followed this advice. Before I had been taking the pills very long I began to feel much better. Continuing their use my strength came back, my appetite improved and the terrible backache from which I had suffered disappeared. I have been married some years now and have two fine healthy children, a girl and a boy, and am in the best of health. I owe to Dr. Williams' famous Pink Pills, and I trust that these few lines may help some other weak, run-down person. All weak, run-down people who will give this blood-building tonic a fair trial will find through its use new health and strength. You can get the pills from any dealer in medicine, or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont."

Demand For Canadian Wheat

Believe That Demand From Orient Will Continue To Increase

Speaking at Shaunavon, Saskatchewan, the other day, A. F. Sproule, director of the Saskatchewan Wheat Pool expressed the belief that the Orient's demands for Canadian wheat, which last year were greater than those of any three previous years, would continue to increase. He mentioned incidentally that the Saskatchewan Wheat Pool now has 925 country elevators and terminal elevators of 26,000,000 bushels capacity, while it is also building another elevator of 6,000,000 capacity.

Nights Of Agony come in the trail of asthma. The victim cannot lie down, and sleep is driven from his grasp. I gratefully received the immediate effect of Dr. J. D. Repp's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. I am indebted to the genuine at your nearby drugist.

To Reconstruct Rolling Mills

Manitoba Rolling Mills To Operate Plant In Medicine Hat

The Medicine Hat City Council has received word from the Manitoba Rolling Mills Company, Winnipeg, that plans are in preparation for the reconstruction of the rolling mills in Medicine Hat, entailing the installation of an open hearth furnace and that the company is considering the use of electricity for the operation of the plant in preference to steam.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

Parks Attract Foreign Tourists

Under the policy of development and publicity being carried out by the Dominion Government the national parks are not only rendering a wider service each year to Canadians themselves, but they are adding to the knowledge of Canada abroad and attracting to the Dominion thousands of visitors from other countries in every part of the globe.

The Family Rolling Stock

Resident Of Vancouver Makes A Most Interesting Discovery

When the small family in moderate circumstances of today carries an amazing amount of rolling stock, compared with the family of a generation ago, J. Butterfield, a writer of The Vancouver Province, makes the astonishing discovery that in one modern family there exists under one management one automobile, two bicycles, one express wagon, four roller skates, two scooters, a kiddie car and a baby carriage. Then there is the lawn mower, retained exclusively for one member of the family. Forty years ago a similar household contained two items of rolling stock, a baby carriage and a collection of hoops. "Is there a hoop all Vancouver now?" asks Mr. Butterfield. Regina Leader.

Minard's Liniment cleanses cuts, etc.

Condensed Milk Production

Within recent years there has been a large increase in the production of condensed milk. The first milk condensing plant was established at Truro, Nova Scotia, in 1833, and there are now in Canada 26 plants for the manufacture of condensed and evaporated milk and milk powder.

Moose Jaw As Convention City

Many Organizations Plan To Hold Annual Convention In Moose Jaw In 1929

The Saskatchewan Postmasters' Association, the Saskatchewan Pharmaceutical Association, the Saskatchewan Retail Merchants Association, the Saskatchewan Teachers' Alliance and the Saskatchewan Educational Association are among recent additions to the growing list of organizations that will hold their 1929 conventions in Moose Jaw.

Internationally And Externally It Is Good

The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, cold and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it on hand.

Banff An All-Year Round Resort

Banff, Alberta, is a mecca of holiday seekers in both summer and winter. During the summer months visitors may enjoy practically every outdoor recreation. Each winter a carnival is held which is attracting an increasing number of visitors annually, and it is predicted that Banff will soon be a world-famous winter resort.

FIREPROOF Farm Construction

GYPROC Fireproof Wallboard is used in the building of elaborate country homes equally as much as for garages, grain bins, poultry houses and barns. For repairs and alterations — for remodeling — for partitioning off extra rooms — it is the most economical and satisfactory wallboard on the market.

Gypoc protects from cold, heat, fire, sound and vermin — yet costs less than materials which do none of these things. Quick and easy to apply. It can neither crack, warp, bulge or shrink. By filling the joints with Gypoc Joint Filler you get a smooth, flat, air-tight surface through which fire, heat, cold and sound cannot penetrate.

Gypoc comes in broad, light, ceiling-high sheets of gypsum rock. Takes any decoration — and is especially suitable for Art Deco. Fuel saved by the insulating qualities of Gypoc will alone pay for the cost within a few seasons.

Clip and fill in coupon for interesting free booklet.

Casein Made From Skimmed Milk Can Be Profitably Used For Manufacture Of Many Articles

The products of Canada's dairy factories include besides butter and cheese, ice cream, evaporated and condensed milk, milk powder, etc., an item seldom heard of, called casein. Of the three thousand odd dairy factories in the Dominion a mere handful manufacture this substance, and yet there is a large, nearby market in the United States, which in 1926, imported 26,000,000 pounds mostly from Argentina. Canada's exports to the United States last year amounted to only 287,000 pounds. Canadian dairy factories can produce casein of high quality and there is no particular difficulty in manufacture. One of the chief obstacles to a large export trade according to the Natural Resources Intelligence Service of the Department of the Interior, is that Canadian manufacturers of casein have not yet seen their way clear to guarantee deliveries in the quantities desired.

Casein is interesting because it represents the recovery of a by-product in dairy factories, because Canada imports considerable quantities and has export opportunities, and because it has a most fascinating list of uses in industry and in the arts. Casein is generally manufactured from skimmed milk. Of course skimmed milk has other and important uses as in the production of skim milk powder, condensed skim milk, skim milk cheese and for feeding livestock. The use of skimmed milk for the manufacture of casein is mainly advocated when circumstances are such that it cannot be put to more profitable use. It is known that large quantities of skimmed milk are going to waste in many dairy factories and if this waste could be converted into casein it would represent a step in the efficient utilization of raw materials and be of benefit to Canadian industry and trade.

Casein is generally prepared from sweet skimmed milk. It is the curd separated by the addition of rennet or of an acid and then dried and pressed. Its uses are legion, though in Canada at present it is principally used in the coating and sizing of paper and also in the manufacture of cold water paints and of special glues for furniture and veneer work. In Europe, however, casein is further converted into a plastic or hardened substance resembling horn and which can be worked into a countless number of useful articles of commerce. There is no manufacture of casein plastics in Canada. If there was we would find that skimmed milk would be used for the manufacture of fountain pens, radio parts, electric fittings, cigar and cigarette holders, chessmen, dominoes and dice, backs for hair and clothes brushes, combs, door knobs, and handles for umbrellas and parasols, glass pens, buttons, beads, and brooches and other inexpensive jewellery and ornaments. These are only a very few of the items which can be made from casein plastic which is a non-inflammable and highly elastic substance which can be sawn, drilled, turned, glued and moulded into any shape desired. It is an inexpensive substitute for many natural materials, often rare and costly, such as Chinese jade, lapis lazuli, ivory, ebony, amber, tortoise shell and coral. Many ingenious effects can be produced with casein plastic, as it can be produced per-

fectly transparent or dyed in a variety of single and marmoreal colors. The considerable quantities of casein still imported into Canada, the increasing exports and possibilities of establishing a really large export market, the opportunities for increasing the output of casein glues, casein paints, etc., as well as in manufacturing casein plastic products, all point to an excellent outlook for the manufacture of more casein in Canada.

Farm Well Water

Only 34 Per Cent Of Wells Tested Were Found To Contain Pure Water

Of the samples of water from farmers' wells analyzed last year by the Experimental Farm Division of Chemistry, 34 per cent were pure and wholesome, 18 per cent suspicious and probably dangerous, 24 per cent seriously polluted, and 24 per cent safe.

Copies of the report of this division may be had on application to the Publications Branch, Department of Agriculture, Ottawa. The report calls attention to the conditions regarding drinking water in villages, and the danger of pollution. A minimum safe distance from a possible contaminating source at which to locate a well is given to be about 150 feet. The report contains much valuable information on soils, fertilizers, silage, and many other lines of investigation.

PASSING OF PROMINENT JURIST

One of Canada's outstanding jurists and a prominent figure in the political field, Mr. Justice Ernest Roy, judge of the superior court, died suddenly, recently at St. Michael, Bellechasse, where he was spending his vacation, in his 57th year. He has travelled extensively in Canada, and his passing will be much regretted by friends throughout the Dominion.

Have Wonderful Memory

Thinking Power Of Elephant Is Almost Human

The almost human intelligence of elephants has often been narrated, and the following instance adds to one's admiration of the thinking power of these mighty creatures.

There was an elephant in the Zoo some while ago, says an article in the Sunday Chronicle, which had a difference with his keeper. This big chap formed a great attachment to a lady elephant in the spring of the year and had to be fastened up for a day or so until he became more amenable to reason.

Of course, these little affairs blow over and, within a few days, I am certain, says the writer, that old Bundy was thinking far more about biscuits and buns than he was about the lady who had, filled his thoughts a few days before.

Bundy collected his biscuits as usual, but studiously avoided the coins given him which were his keeper's perquisites. When at last a persistent visitor insisted upon putting a copper into his trunk, he deliberately handed the copper to the keeper of another elephant who was passing him at that moment.

Never again did Bundy give his keeper a penny. He had quite got over his love affair, but he never forgot that it was the keeper who frustrated him and—at least I suppose so—he made him pay for it.

"What does that 'R.S.V.P.' mean on a wedding invitation?"

"Well, in some cases it seems to mean 'Requesting some valuable presents.'"

Some men find consolation in thinking the things they dare not say.

Will Erect Cairn Near Banff As An Historical Reminder Of The Work Of Empire Builders

(By Charlotte Gordon.)

In the heart of the Rocky Mountains on the Banff-Windermere road will stand an historic reminder of the work of our Empire builders, a monument to Sir George Simpson, Governor of the Hudson's Bay Company from 1821 to 1860. The fast moving autocratic ruler of the great wilderness was the first white man to cross the mountains by Simpson's Pass. As one of the earliest pathfinders, the Historic Sites and Monuments Board of Canada deemed him worthy of a memorial.

The cairn is built on the roadside, to the left, driving from Banff, and 54 miles from that mountain resort. The unveiling will take place on the 26th of September when the Governor of the Hudson's Bay Company, Charles E. Sale, of London, England, will be present. His Honor Judge F. W. Howay, of New Westminster, British Columbia, will represent the Historic Sites and Monuments Board of Canada at the event. Mr. T. C. Elliott, of Walla Walla, will attend as the envoy of the Oregon and Washington Historical Societies. The arrangements for the event are being forwarded by Mr. J. C. Campbell, of the Parks Branch, and Mr. Wardle, superintendent of Rocky Mountains Park. Residents of Banff are planning to assist in making the ceremony in its wondrous mountain setting, a memorable one.

The inscription on the tablet reads: "Sir George Simpson.—In recognition of the public services of Sir George Simpson, Governor of the Hudson's Bay Company Territories (1821-1860), under whose guidance the 'Far West', the 'Far North', and the Arctic Coast of Canada were explored, peace with the natives was maintained, trade developed and British rule strengthened."

"In August, 1841, he was the first white man to cross the Rocky Mountains by Simpson's Pass. Erected, 1928."

It is said that Sir George Simpson left a register on a tree in Simpson's Pass, in the form of a carving of his initials and those of his guide, Mr. James Stewart, of Banff, who is familiar with the mountain districts, states that for two years he looked for this tree, when in the vicinity. He finally found it in 1912. The tree, about 16 inches in diameter, had fallen down with the blaze on the under side. The main body of the tree was rotted through, but the blazed section had been preserved apparently by the pitch that had collected on the surface when the bark was taken off. The portion of the tree is in possession of Mr. Brewster. It bears the initials G.S. and J.R., those of the famous governor and of his guide, James Roland. The date carved is

1841, the year in which Sir George made his famous journey around the world.

Not until 1841 when the governor journeyed through Simpson Pass do we find a southern gap in the mountains used. All early travellers used the northern passes because of the warlike Indians of the south.

Sir George Simpson, who was undoubtedly a man of vision, found time to concern himself with even the religious interests of his vast domain. Through his suggestion Dr. Robert Terrill Rundle, who arrived in Canada in 1840, was engaged in mission work in this country. Dr. Rundle is eternally commemorated in the great dark peak, Mt. Rundle, that overlooks the mountain resort of Banff, Alberta.

Cull Potatoes For Poultry Fattening

Results Of A Series Of Experiments

Potatoes when available make an excellent fattening feed, and when cull-potatoes are fed, are a source of profit that might otherwise be lost. This is the finding after a series of experiments conducted by the Experimental Farm Poultry Division, Barred Rock and White Leghorn-capons were used in the experiment, one lot of each being fed cornmeal and the other lots potatoes.

It was noticeable that gains per bird were greater for the Barred Rocks, and also for the birds on corn meal. The same may be said of percentage gains per bird except that the Leghorns showed a greater percentage gain than the Barred Rocks. The same amount of feed was consumed by each of the two lots. Owing to the use of potatoes, and in spite of the fact that they constituted but one-fifth of the ration, the cost of feed per pound of gain was less in the case of the potato fed birds than the corn meal fed. This also in spite of the fact that the corn meal fed birds made slightly the greater gains.

The results of this experiment do not indicate that potatoes are superior to corn meal, except from the standpoint of economy, but it would tend to indicate that potatoes when available make an excellent fattening feed. The potato fed birds made the most attractive dressed fowl. Flavour, as judged by persons who tasted capons fattened upon both feeds, was considered to be superior in the potato fed fowl in every case.

The Poultry Division, annual report which may be had on application to the Publications Branch, Department of Agriculture, Ottawa, contains the results of many other experiments of interest to poultry breeders.

To Reconstruct China

The London Daily Express says that a syndicate of manufacturers, with interlocking interests in almost every phase of British industry and trade, has been formed to reconstruct parts of the war-ravaged areas of China. Contracts about to be signed between the syndicate and the Chinese nationalist government will involve a total capital of \$45,000,000, the newspaper says.

Many a fellow who's a big noise at the office is only a little squeak at home.

"Shall I have wings when I go to heaven?"
"Yes."
"Shall I be able to fly?"
"Yes."
"Shall I lay eggs?" — Vikings, Oslo.

A CONSISTENT WINNER

If there is anything in a name "Victor," the prize horse of the Canadian National Express, at Winnipeg, has proved it. Entered at a number of horse shows and fairs in Western Canada, "Victor" has scored an impressive list of triumphs in competition with the best horses of his type in the west. His record is as follows:

1928—The silver cup at the Winnipeg Horse Show, 1928—Three first at Canadian Fairs, June 23-July 2; Livery, mare or gelding in harness class; road class; trotters or pacers.

Portage Industrial Exhibition, July 9-11: 1st in roadster class; 1st in single delivery class; 2nd in heavy harness class; 2nd in best harness horse class. In these events he beat a horse which cost over \$2,000.

Baskaloon: 1st, best equipped horse; 2nd, light delivery; 2nd, heavy delivery; 3rd, best road horse; 4th, heavy harness horse.

"The judge said, 'If you surrender promptly to your ball, it will be in your favor.'"
"And shall you do so?"
"Certainly, I stide his watch so that I could be punctual."—Lustige Kolner Zeitung, Cologne.

MORAL VALUE OF THE PEACE PACT IS NOW STRESSED

Paris.—Lord Cushendun, who signed the peace pact in behalf of Great Britain, Northern Ireland, and India, said that it was a great and historic event, but he cautioned against the inference that the activities of Secretary Kellogg, of the United States, in elaborating the treaty meant that the United States would depart from its policy of aloofness toward European complications.

"So far as this pact is concerned," he said, "it carries with it no implication that the American people must concern themselves with European matters."

The British minister emphasized the moral value of the pact, recalling that Napoleon once said that the great factor in war was the moral factor.

"So it is in peace," Lord Cushendun said. He added: "No one imagines that signing this treaty will immediately and finally banish war from the face of the earth. That would be a mistake. Possibly there will still be small wars somewhere on the earth, but do not let the cynics be encouraged because the moral value of the pact remains and that is the real value of this treaty."

Lord Cushendun said that personally he divided the credit for the negotiation of the treaty between Foreign Minister Briand and Secretary of State Kellogg, but he recalled Sir Austen Chamberlain's activities of the last few years in favor of peace, and claimed for him as much credit as for any one else in the crusade against war.

Chinese Facing Starvation

Crops in Many Districts Have Been Ruined

Shanghai, China.—The population of 1,500,000 in a district 30 miles wide and 100 miles long on the border of South Chihli, and Northwest Shantung, is facing death from starvation, said Earl Baker, secretary of the New York-China famine fund committee on his return from a visit to the stricken area.

There has been sharp differences of opinion, both in China and the United States, regarding the necessity of relief measures.

Mr. Baker said he is convinced that relief must be sent at once. He stated that 150,000 persons were in an exhausted state of malnutrition and apparently doomed to death and that 30,000 were slowly starving.

Drought and grasshoppers have ruined the crops in the famine district, said Mr. Barker. He added that the grasshoppers now form part of the diet of thousands of the stricken people. One village, he said, was eating fried grasshoppers on a whole-sale scale, the insects being the only food of many houses which he visited.

Well Known Finn Injured

Saskatoon.—Ivar Autunen, a well-known Finn, who boasts the longest moustache in Christendom, and who is known all over the Dominion, particularly in newspaper offices, was seriously injured when hit by a car here. He is in hospital suffering from a fractured skull and broken collarbone.

Cheque For Doctor Doolittle

Toronto.—Doctor P. E. Doolittle, veteran motorist, was given a \$5,000 cheque by the Canadian Automotive Industries in appreciation of what he has done to make motoring in Canada more available.

Building New Town

The Pan Man.—Surviving at the Cold Lake townsite has been completed. The new town has not been officially named but it will probably be known as Cold Lake. It is surrounded by rich mineral deposits.

Epidemic At Athens

Athens.—Eighty per cent. of the population of Athens and Piræus have been affected by the epidemic of dengue, it is now estimated. The fever was spreading in the provinces.

W. N. U. 1740

Declares Navy Pact Letter a Forgery

Foreign Office Says Document is Falsely Forged

London.—"We have now seen a copy of the letter which purports to have been written by Sir Austen Chamberlain, secretary of state for foreign affairs, to Aristide Briand, French foreign minister, concerning the alleged terms of an Anglo-French naval agreement, and we have no hesitation in declaring that the letter must obviously be a forgery. No communication, even remotely in such a sense as suggested has ever passed from Sir Austen to M. Briand."

This statement was issued by the foreign office to the Canadian Press. The document, a summary of which was published widely in the United States and Canada and occasioned a great sensation, has now been received in London and is stated to be a most patent and palpable forgery.

It is understood that the British government has notified instructing to deny categorically the authenticity of the document.

Air Mail Service

First Air Mail In Western Canada To Operate From The Pas

Saskatoon.—The first air mail establishment of Winnipeg will be established from The Pas to Cold Lake Friday.

W. Rippington, of the Saskatoon post office, will represent District Superintendent J. H. Hunter at the inauguration of the weekly air mail service, which W. A. Rae, barrister at Cold Lake, terms one of the greatest boons ever presented to the pioneering prospectors at Cold Lake.

Formerly mail was taken to and from Cold Lake at infrequent intervals, greatly handicapping the work of the mine recording office established there last April.

The new post office will be named Klissing, the Cree word for "cold." Under the new system mail will reach Cold Lake every Friday, returning the same day.

Peter C. Deure, a pioneer merchant at Cold Lake, has been appointed postmaster.

Little Damage From Rust

Rust Menace In Saskatchewan Did Not Materialize

Moose Jaw.—Although conditions in Saskatchewan were propitious for a heavy rust infection during the month of July, the rust menace in Saskatchewan has not materialized. This was the statement made here by Mr. P. T. Ellis, field crops commissioner for Saskatchewan, following his return to this city from a 1,000 mile tour of inspection throughout the province.

"While the heavy crop stands and the succulence of the leaves and stems of the grain, together with the unusual amount of moisture in the atmosphere in the month of July, indicated the possibility of heavy rust infection, the rust menace has been practically negligible," said Mr. Ellis.

Canada May Be Honored

Likely To Have Representative In Court Of International Justice

Regina.—Canada may have representation on the bench of the permanent Court of International Justice, in the person of either the Right Hon. Mr. Justice Duff, or of Eugene Lafleur, K.C., of Montreal, according to an announcement made to the Saskatchewan Bar Association by the Hon. N. W. Howell, K.C., of Toronto. A vacancy has occurred on the bench owing to the resignation of John Bassett Moore, a renowned United States jurist, and the names of the two Canadians were submitted for election. This will occur in about a month's time.

Will Continue Vaccination

Geneva.—The smallpox vaccination committee of the League of Nations has voted that despite the development of occasional cases of sleeping sickness from vaccination, there was no reason for discontinuing the practice which it regards as the most powerful weapon against smallpox known to medical science.

DISTINGUISHED VISITOR

Sir Campbell Stuart, of London, Eng., who is in Canada to report on the merger of the Eastern Cable Co. and the Marconi Wireless Co., to the Canadian Government. It is claimed that the merger will save a million dollars to taxpayers of Canada and at the same time free the government of any further liabilities, as well as bringing the world to the doors of the people of Western Canada.

To Aid Prisoners

Toronto Chief Of Police Interested In Movement To Assist Ex-Convicts

Toronto.—If given the co-operation of churches and welfare organizations, General D. C. Draper, chief of police, said he would prevail upon the federal government to assist in a movement to help ex-convicts to establish themselves in society.

Declaring that he had personally met twenty ex-convicts who had told him they were being hindered instead of helped in their endeavor to live down their past and start life again, General Draper said he advocated dominion-wide organization of committees representative of churches and welfare associations to assist men leaving penitentiaries to obtain work and aid them to get straight.

New Seed Cleaning Station

Announcement Made That Plant Will Be Established At Saskatoon

Saskatoon.—An announcement that the government will establish a seed cleaning station here, similar to the one operating at Moose Jaw, was made by Dr. J. H. Griadale, deputy minister of agriculture, who is on an inspection trip through the West. Several other smaller stations would be established in the province, he said. Dr. Griadale remarked on the evident prosperity throughout the Dominion, and spoke particularly of progress in the Peace River country. He said he was amazed at the results obtained by the use of phosphates in the treatment of grain at the Scott experimental farm.

Prince George Crosses Canada

H.R.H. Prince George, K.G., fourth son of the King, photographed aboard the Canadian Pacific liner "Empress of Australia" on his arrival at Quebec. It is anticipated that this unconventional portrait will earn for its subject a reputation of his brother's unofficial title—"The Smiling Prince."

Predicts Rapid Mail Service

Airplanes Will Aid Communication Between England and Canada

Montreal.—A rapid mail service by airship between Great Britain and Canada was forecast by W. G. Williams, parliamentary secretary to the British Board of Trade. There were two great airships now under construction in Great Britain, one by the government, the other by Commander Burney, and the latter was likely to have its trials toward the end of the year.

"I should be surprised," Mr. Williams said, "if we do not see the development of rapid mail communications between England and Canada through airships."

Mr. Williams was speaking at the first conference of the delegates of the Empire Parliamentary Association now visiting Canada. The conference was with members of the Montreal Board of Trade, the subject being empire transportation.

Completes Arctic Patrol

Canadian Government Ship Is On Homeward Journey

Ottawa.—The Boethic, the expeditionary ship of the Canadian government, has completed its annual patrol of Canada's Arctic archipelago and is now on its southern journey home to Sydney, N.S., which it is expected will be reached early in September.

This information was conveyed in wireless messages from the ship to the Northwest Territories and Yukon branch of the department of the interior.

George P. Mackenzie, officer in charge of the expedition, reported that there had been an epidemic last winter among the natives living around Frohisher Bay and that there had been 25 deaths, mostly children. With this exception, the health of the natives in Baffin Island has been excellent.

Aftermath Of B.C. Tragedy

Debris Found Near Seattle Thought To Be Part Of Wreck Of Missing Plane

Seattle.—Pieces of aeroplane upholstery and several tourist postcards, supposedly from the British Columbia Airways' plane which disappeared Saturday morning with seven persons, were picked up on the beach several miles southwest of here.

Lt.-Commander L. L. Bennett, directing the coastguard search for the missing plane, declared he was satisfied that the fragments of upholstery were from the giant aeroplane. He ordered the search renewed in Fort Discovery, where the articles were picked up by George A. Smith, fire warden, and Dr. E. E. Gleason.

With the pieces of upholstery were several fragments of felt used to insulate the body of the plane from the engine.

INDUSTRIAL GAINS ARE MADE BY GREAT BRITAIN

Montreal.—Herbert G. Williams, M.P., parliamentary secretary to the British Board of Trade, addressing the Canadian Club, stressed some misconceptions about the old land.

"Some people think," he said, "that Great Britain has passed the peak and begun to decline. I am satisfied that this does not represent the truth."

As an instance he pointed out that in export of electrical machinery Great Britain before the war occupied third position with the United States and Germany first. Now Great Britain leads both the United States and Germany.

The number of people at work in Great Britain now was three quarters of a million greater than before the war, or a total expansion greater than that of Canada.

"We have made a total greater progress in the last fourteen years than you have," Mr. Williams said. "It was true the Great Britain also had a greater volume of unemployment. That, too, was three quarters of a million greater than in 1914."

"We relieve the burden," Mr. Williams proceeded, "with a system of unemployment insurance, which is my profound regret some newspapers describe as a dole. It is no more a form of charity than when you businessmen pay a fire insurance premium and the company pays you insurance if you have a loss."

Mr. Williams urged further development of trade between Great Britain and Canada. Trade between Canada and the United States was done for dollar, while Great Britain bought from Canada to the amount of two and one half dollars for every dollar's worth she sold to Canada.

"We would like to get a little of that American trade," he added.

Mr. Williams compared the results of the census of production taken in Great Britain and Canada in 1924, and said that 45 per cent. of the total population of Great Britain worked for a living while 36 per cent. worked for a living in Canada. In other words nine per cent. more people worked for a living in Great Britain than in Canada, with 50 per cent. more women working for a living.

Mr. Williams pointed out how Great Britain had been able to retain her preponderance at sea despite efforts made by other countries to capture it. "One attempt to capture it had been made by the people of the United States. 'So far as I can see,' he said, 'they regret it.'"

Will Continue Search

Bergen, Norway.—The Russian ice breaker Krasnia, searching for the plane and missing crew, after the fatal Italia expedition, has proceeded to King's Bay where the Russian aviator Chukhovsky joined the vessel. The ice breaker will continue to Franz Josef Land, where a base will be established.

Riots In Berlin

Berlin.—A group of communist demonstrators, protesting against the proposed construction of a new German battleship, attacked police guards here and were fired upon. Three persons were wounded seriously and a score were hurt in the rioting. Police arrested 20 after the disturbance.

Criticism Is Resented

Ottawa.—Lord Lovat's Winnipeg comment on Canada's "immigration" policy has caused much indignation among the officials of the Department of Immigration and Colonization. These officials are very sensitive on this question as there has been much criticism of their attitude toward British immigration.

Commissioner Eddie Dead

Windsor.—Commissioner William Eddie, of the Salvation Army, is dead at Balmoral, Scotland, according to word received here. For the past two years he had been in charge of the work in Western Canada.

Farmers Talk To Flying

A farmer living a few miles north of Moose Jaw has purchased a Moth aeroplane and it is understood that several others are about to follow his example.

Here and There

(124)
The Provincial Government of Nova Scotia has arranged to have the Boy Scouts undertake the re-foresting of 1000 acres of land in the Bear River area, Digby county. A similar programme was carried out on a smaller scale in the Waverly district, Halifax county, last year.

The vicious dog fish of the Pacific coast has at length found his niche in the scheme of economic usefulness, judging by a new industry setting under way in Vancouver. Dog fish oil is the base of a preparation for keeping away mosquito, black flies and other insect pests which molar man and beast alike. Several barrels a day of dog fish oil are being used in the manufacture of the preparation.

A Pacific Coast mariner whose name is well known throughout the country has announced his intention to retire from active service. Captain James D. Troup, veteran of 55 years of continuous service on Pacific coastal waters, 26 years of which he spent in British Columbia, has relinquished his position of manager of the British Columbia coast steamship service of the Canadian Pacific Railway. His place has been taken by Captain C. D. Neroutas, formerly assistant manager.

Golf in the heart of the Canadian Rockies is becoming so popular that a miniature course has been opened at Castle Mountain Bungalow Camp in Vermilion Pass on the Banff-Windermere Highway. This new course is probably the highest, smallest and most effectively situated of any golf links in the British Empire. The ingenious lay out of the course is the handiwork of Stanley Thompson, internationally known golf architect, who also designed the recently enlarged links at Banff.

Another recruit has joined the ranks of the famous Contented Corps at the Carnation Milk Farms at Seattle, Washington, the Canadian Pacific Railway supply farm at Strathmore having sold one of their prize heifers to the Carnation Milk company. The animal, bred at the C. P. R. farm, is the first Holstein female from the prairie provinces to be accorded the grand championship at the "A" circuit shows in the west, an honor which had previously been won by cattle either from Ontario or from the Pacific coast.

So notorious a reputation has the fisherman won for himself as a prevaricator that he must needs enter his fish in competitions with a duly signed and witnessed affidavit. The latest record catch to be reported to the General Tourist Department of the Canadian Pacific Railway is a six and a quarter pound speckled trout, hooked at Pine Portage near Nipigon River Bungalow Camp. It is the largest so far to be entered for the local fishing trophy, although many fine fish have rewarded anglers in the neighbourhood this summer.

The Japanese coronation ceremonies in November will probably result in a demand for more motor cars from this continent, said J. A. Linsley, Canadian Trade Commissioner in Tokyo, who said recently from Vancouver, showed the Canadian Pacific ship Empress of Asia. The forthcoming coronation procession in which, as teams and other picturesque means of locomotion have participated in the past, will probably be largely motorized on this occasion, he said.

PAINTED FIRES

—BY—
NELLIE L. MCLUGN
Copyright, Canada, 1928

CONCLUSION

At Arthur Warner's bungalow the flowers were blooming. Hollyhocks stood straight and tall against the house, with their quaint, old-fashioned rosettes in prim rows on the stalks, crimson and cream and white. Arthur had planted them, but had not seen the bloom. The walk from the house was bordered with round clumps of dwarf nasturtiums, orange and red, alternating with mounds of sweet alyssum and candytuft, white as snow, and at their feet in a straight line, marking the edge of the gravel path, ran a line of round lobelia as blue as the skies above.

On one side of the walk stood a rocky of stones from the river, which Helmi had whitewashed, and from which now grew trailing nasturtiums, in all the shades from creamy pink to scarlet and crimson, peeping out from their glossy green leaves. On the other side was a rustic bench made gay with cushions, where one could sit and think and dream, watching the changing lights upon the mountains.

Here sat Helmi, thinking and dreaming, this Saturday afternoon in late August. Her family had all gone to Eagle Mines—Rose and Danny Corbett were spending the holidays with her; old Sim and young Lili, the latter now an enquiring young lady of two and a half years. The teacher, too, who boarded at the bungalow had gone with them.

Twice a week Helmi sent to town a load of vegetables and fresh fish from the English River, and steadily her savings in the bank were increasing. It seemed a long time since she had climbed into the old backboard with Lili on her knee, Cleo close beside her, and the pups in a box behind, and canvassed the neighborhood to see where she could get a cow "on terms to suit purchaser." She had been successful in her quest, and brought the cow home with her; the

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a
Grateful Woman

Vanessa, Ont.—"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and my youngest is a bonnie boy now eight months old. I have taken your medicine before each time I was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."—Mrs. MURDO, McMillan, Vanessa, Ontario.

W. N. U. 1749

terms being that she do the weekly washing for the numerous and increasing Peterson family, three miles away.

Helmi thought of her neighbors now with real affection. They had all befriended her, and she was glad that Arthur Warner had learned to know them better. Helmi had told them quite frankly all she knew of him, and when his letters came she made no secret of them. When she made the suggestion that weekly meetings should be held at his house, where knitting and sewing could be done for the soldiers, the women gladly came, and a new spirit of friendliness came to the settlement. Every week a letter was written to him, and parcel sent, and so it came about that—though thousands of miles intervened, Arthur Warner had come to know his neighbors and they him.

No letters had come from Arthur now for several months and Helmi feared that the shadow she had seen upon his face the day she said good-bye to him, had fallen. In her dreams she had seen a luminous figure, all in white, that had walked over to Arthur and tapped him on shoulder; and he nodded his willingness and went away, and the same night Cleo had fretted and cried all night and would not be comforted.

But the boxes went every week, for Helmi and the women knew that some poor soldier would be happier for them.

Of Jack she had not had a word, and in the midst of all her happiness and achievement there was the one sore thought which sometimes required all Helmi's faith to drive away. Jack's fate, so sad and drawn, drifting away from her on the slowly moving train, fell across her happiest hours. But Helmi had not forgotten the experience she had the night of the storm, when her soul was lifted high above the mists of earth.

The hearts of the women were knitted to Helmi's because she had a way of comforting them in their troubles. There was strength in the touch of her hand, and healing in her presence.

"Look what she's done for me," old Sim would often say, "when I got crippled for good and couldn't do my work in the mine any more. 'Come to me, Sim,' she said; 'I am all alone except for little Lili and the dogs, and you, you sim,' she says, 'for company'—make it out I would be doin' her a favor. Look what a home she has given me."

It was Helmi, too, who discovered the seam of coal a little farther up the river, shining and hard, that burned with a blue flame and gave off more heat and burned longer than any other coal she had ever seen; and it was like her to tell all the neighbors about it and urge them to come and get all they wanted for their winter fires.

The peace which comes to those who work hard and have a clear conscience was Helmi's that afternoon as she listened to the waterfall behind the house, and through her dreaming came the happy consciousness that her family would soon be home hungry from town and she would need to go into the house and get supper ready.

The valley before her was beginning to show the purpling tints of evening as the sun wheeled its way over the mountains. A car came quickly around the turn of the hill, its wheels making no sound in the dusty road. . . . He was half way to the house before Helmi saw who it was.

That night after the others had gone to bed, Jack and Helmi sat long before the fire. Little Lili in her pretty, white nightdress was fast asleep in her father's arms. "Let me lay her down, Jack," said Helmi. But Jack could not part with her. "Remember I am two years and a half behind," he said. Helmi bent over him as she tucked the shawl around the little girl. "You won't leave us again, Jack, will you—not even for gold to the Nebanni?"

"Gold from Nebanni!" Jack repeated after her. "I should say not! What do I need of Nebanni gold?" Then drawing Helmi's face to his he said tenderly, "I got my gold from Finland."

Eight years have gone by. The Warner mine is one of the best in the Province, for the coal is a high-grade anthracite. Unlike most mine owners, the Warners have not moved to the city, but have a large gray stucco house, with a red roof and

many windows, on the bank of English River. Behind the house is a large grassy playground, enclosed by a high board fence, where a happy group of children and collie dogs may be seen at play. There is one old dog that walks stiffly, but is plainly the best loved of all.

Below the falls stands a green and white bath-house, into which the water is piped from the stream. It is called the "Finnish Bath-House," because there is in it a room for steam baths where the steam is formed by water falling on heated stones.

There is a recreation ground across the road, and a white church on the hillside. In the basement of the church there is a well appointed dining-room, where the boys and girls club often meet for supper parties. The bungalow is a club-house for the miners and their wives, and on the lawn there is a simple white stone with an inscription which reads:—

"Sacred to the Memory
of

ARTHUR WARNER,

who made the first settlement in this valley, and who loved its solitude and beauty.

In 1914

he answered the call of his country:

On January 25th, 1917 while escaping from a German prison camp, he deliberately gave his own life to purchase freedom for his companion, who now erects this stone. In the hope that as long as green firs in the valley, and water runs in the English River, the memory of ARTHUR WARNER may not fade.

THE END

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed to be absolutely harmless even to the new-born babe. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

But now abideth faith, hope, love, these three; and the greatest of these is love.—1 Cor. xiii. 13 (R.V.).

More faith, dear Lord, more faith! Take all these doubts away; On let the simple words "He saith" Confirm my faith each day.

More hope, dear Lord, more hope! To conquer timid fear.

To cheer life's path as I go grope Till Heaven's own light appears.

More love, dear Lord, more love! More love, dear Lord, more love! All graces and all gifts above, Unselfish love be mine.

—Elizabeth C. Kinney.

Hope is the mainspring of human action; Faith seals our lease of immortality; and Charity and Love give the passport to the soul's true and lasting happiness.—Street.

The Porcupine Gold Area

The Porcupine gold area in the District of Cochrane, northern Ontario, occupies first rank among the gold producing areas in Canada.

Minnard's Liniment for Every Pain.

British Industries Fair

To Be Held At Birmingham, England, February 18 to March 31, 1929

The attention of Canadian Manufacturers is directed to the British Industries Fair, Birmingham, Eng., 1929, where the Canadian Government has contracted for 2,800 square feet of space. It is hoped that Canadian manufacturers will be well represented at this forthcoming fair, and with a view to furnishing detailed information, advance circulars are being forwarded both to the Canadian Manufacturers' Association, Toronto, and the Department of Trade and Commerce, Ottawa.

The tenth fair will be held from February 18 to March 31, 1929, in the permanent and considerably enlarged exhibition building at Castle Bromwich, which with a total floor space of 400,000 square feet forms the largest exhibition hall in the United Kingdom. The venue of the fair is the centre of a great industrial area and is most conveniently situated for displaying general manufactured goods.

In connection with above, the Canadian Pacific Railway offers prospective exhibitors and buyers ten convenient sailings from Canada's national winter port, Saint John, N.B. Dates of sailing are as follows:

Feb. 1, S.S. Minnedosa, Liverpool via Glasgow; Feb. 8, S.S. Metagama, Liverpool via Glasgow and Belfast; Feb. 15, S.S. Montserrat, Liverpool via Glasgow; Feb. 21, S.S. Melita, Southampton via Cherbourg; Feb. 22, S.S. Montrose, Liverpool via Belfast and Glasgow; Mar. 1, S.S. Minnedosa, Liverpool via Glasgow; Mar. 8, S.S. Montclair, Liverpool via Belfast and Bedford; Liverpool; Mar. 14, S.S. Metagama, Southampton via Cherbourg; Mar. 15, S.S. Montserrat, Liverpool via Glasgow.

Excellent accommodation is available on all these cabin class ships at winter rates, which are considerably lower than during the heavy season.

Attractive rail fares are available from all points in connection with ocean passage.

The Canadian Pacific Railway Co. will be glad to arrange accommodation for those planning to attend the Birmingham Fair. Requests through any G.P.R. agent will receive courteous and prompt attention.

New Serial Story

Commencing with next issue we offer our readers a new serial story: "The Crimson West," by Alex. Philip. As might be imagined, the story deals with life in Western Canada, the plot being laid in British Columbia. It is full of life and action, and should have a particular appeal to the lovers of out-doors and to Western Canada readers generally. The story is dedicated by the author to those fortunates who first saw the light of day in this glorious country and with whom rests the future prosperity of the land of their birth—the native sons of Canada. Do not miss the opening chapters appearing next week.

Growth Of Tree-Planting

In connection with the distribution of trees to prairie farmers in Canada which is made annually by the Tree Planting Division of the Forest Service, Department of the Interior, it is interesting to note that each spring nearly 8,000,000 young trees are sent out; shipment of these trees require 2½ carloads of moss and nearly 10 million of 4½-inch barbed wire. Before many years are gone, the "Treeless Prairie" will be a thing of the past.

So far nobody has climbed the Matterhorn on roller skates or ridden up Niagara Falls on a bicycle, but it would look as if about everything else had been tried.

Teeth and Health

Issued by The Canadian Dental Hygien Council and Published by The Saskatchewan Dental Society

THE BICUSPIDS

"Count them"—two in line back of each cuspid, making eight all told. "Bi-4-cuspid"—8 teeth, with one point, or "cuspid"—so this, then, is a two cuspid tooth.

"You have doubtless observed, however, that the inner cusps of the lower tooth is but rudimentary—a modified form of the original (full cuspid). Then, they are also called pre-molars—again our Latin—"pre," meaning "before"—you see we are well on our way."

This tooth erupts generally from the tenth to the twelfth years, and though chiefly utilitarian, yet it serves a cosmetic function as well—to prove this save up your best job and tell it to your neighbor—then slyly observe the open space marking a missing bi-cuspid which you had probably not seen before.

To paraphrase: "Loud laugh behind the vacant space." Now, there is a danger peculiar to the upper bicuspid which is this. This tooth is in a position just below the "antrum," or air sinus that is situated in the large facial bone, the upper maxillary, and frequently just a thin shell of bone forming the floor of the antrum, separates the latter from the end of the root or roots.

Should this decay proceed so far in this tooth as to infect the pulp, causing it to die, with a resultant abscess—it occasionally happens that pus will burrow into the antrum, infecting it and with dire consequences—generally necessitating an operation at the hands of the surgeon. Tell your dentist, that you want your teeth kept well, not just made well. The responsibility is then his.

Canadian Butter Consumption

The per capita consumption of butter in Canada in 1926 has been estimated at nearly 28½ pounds and the consumption of cheese slightly over 4 pounds.

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need for its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops and the colic or constipation is relieved; or diarrhoea checked. A vegetable product, a baby remedy more for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it! It may spare you a sleepless, anxious night. It always cures, always safe to use; in emergencies, or for everyday ailments. Any hour of the night or day that Baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every drugist has it.

ESSEX Super

See this special ESSEX chassis display

and the costly car way it is built

The most important part of your car—is the part you never see! But now we are especially displaying an Essex chassis to show the costly, fine-quality way it is built. Aside from such self-evident superiorities as its brilliant performance, beauty and quality, these advantages speak for the complete quality way in which the new Essex Super-Six is built—things seen or unseen.

Stony Plain and District.

The Wednesday half holiday season is now over, in Stony Plain; and from this date the places of business in town will be open Wednesday afternoons.

In Edmonton, Friday, Aug. 31, to the wife of Mr. Franklin K. Clarke (of Jasper) a daughter.

Mr and Mrs Gellhouse returned Sunday from a motor trip to their old home at Stettlen.

Henry Treit has returned to Springfield, Ill., to resume his studies.

Mr Ph Trapp, general merchant, made a business trip to Edmonton on Tuesday.

Mr Carl Mayer underwent a major operation in an Edmonton hospital last week.

Prof. A H Schwerman, Edmonton, conducted services in St Matthew church (Missouri Synod) on Sunday last, in the absence of the pastor.

7% is a good return on your money; so is a subscription to your local paper.

With the Shooters.

The Weekly shoot at the Comet luts for the Ash Bros. Cup is proving to be a big attraction; at the last competition the cup being handed over to Mr Geo Sites, the high man. The runners up were M McKinlay and E K Sites. The holder of the high score for the season, at the close of the competition, receives a watch, in addition to holding the Cup.

The Stony Plain rifle club now has a membership of 92 and some inconvenience is caused by the lack of rifles when a large delegation turns out to shoot at one time.

Riflemen from the City and from Holhorn clubs are present at practically every competition.

Brightbank News.

Mrs Chas Edwards entertained on Aug. 24 in honor of Miss Jean McLean of Edmonton. A large crowd attended from far and near; dancing and singing were indulged in till the wee sma' hours. This tends to show the popularity of our former teacher at Willingdon school. Her many friends wish her every success in her new undertakings.

Messrs M Badke, E Erickson and O Erickson and B Edwards have left for the harvest fields.

Mrs H L Stirling has returned home, after a three weeks' sojourn in the Royal Alex. hospital.

Mrs E McEwan, of Olds, paid friends here a flying visit last week.

Word has been received here of the death at Mount Park of Mrs R Macleod, formerly of Brightbank. She leaves to mourn her loss, her husband and seven children.

P. J. Rock Gets Hoadley Cup

Mr Peter J Rock of Morrin won the Grand Challenge Cup offered by Hon. George Hoadley, Minister of Agriculture, for the best field of wheat entered in any of the field crop competitions in the province of Alberta this year.

Spruce Grove News

Herman Dachelke made a motor trip to Ellerslie over the week-end.

Mr MacKean returned on Tuesday from a holiday trip to Jasper.

While Mr Raney was returning from the City, one evening last week, with a newly-purchased Ford coupe he had the misfortune to have an accident at the Beuerlein crossing. On passing over the tracks one wheel collapsed and the car turned over, smashing two other wheels. The only other occupant of the car was Mrs Raney, and she escaped without serious injury. The car was taken to the Grove for repairs, which included three new wheels. Mr Raney farms the old Todd half section north of town.

Carvel News.

Special interest is being taken in the meeting to be held in Ukrainian Hall on the evening of Saturday next, Sept. 8th, at 8:30 o'clock. The subjects to be discussed have been engaging the attention of members of the association for some time past, and there will, no doubt, be a lengthy flow of oratory before the matter is amicably settled. Predictions are made the chairman will have a busy evening, and may possibly require the help of the strong arm of the law.

Mr Robertson, the new blacksmith here, opened his shop on Friday. This gentleman is from Edmonton, and patrons may rest assured of having a good job done.

Fire broke out early Thursday morning in the barn of John Washlyshin, which destroyed the building, 25 tons of hay, 20 tons green feed, harness, and John's best team of horses. Shortly before the fire was discovered, there had been an electrical storm, with lightning. There is a possibility that the barn was struck. An insurance expert offers another solution—that the fire was caused by spontaneous combustion in the hay, which often happens to hay when put in the mow damp. No insurance was carried.

Meredith Bros. want cattle. Phone 24.

This sign represents a good thing—a Savings Account for your child. You may have these from the local merchants who carry them. Your Drug Store has these Certificates—get one and start your child saving.

DISTRICT COURT SITTINGS

PROVINCE OF ALBERTA.
1928.

Judicial District of Edmonton.
AT STONY PLAIN—

Wednesday, October 24th.
All sittings open at 10 o'clock a.m. unless where otherwise stated.
GEORGE B. HENWOOD,
Deputy Attorney General.
